

**OVEN CLEANER
(LIQUID)
Grill-Oven &
Fat Fry Cleaner**

PRODUCT INFORMATION

DESCRIPTION: Liquid Oven Cleaner is an easy to handle thick gel that clings to vertical surfaces to provide maximum cleaning action until the job is done. It quickly and completely breaks up baked on carbon deposits and baked on grease for easy wipe-away pick up.

USE: Liquid Oven Cleaner is used to dissolve baked on carbon-crusted grease on ovens, deep-fat fryers, ranges, grills, rotisseries and vent hoods.

DIRECTIONS: Spread newspapers under oven door. Use either in warm (200°) or cold empty oven. **NEVER USE ON HOT OVEN!** Remove and clean racks separately.

After putting on rubber gloves, use applicator to brush on oven surfaces carefully. Avoid spattering and always stroke away from you. Apply to back panel of oven first, then to sides, bottom, top and finally the oven door.

Close door and allow to work 20 - 30 minutes. Then wipe clean with a wet cloth, sponge or paper towels. Rinse applicator and gloves immediately after using. For heavily encrusted areas, repeat application, using steel wool or soap pad.

In federally inspected meat and poultry plants, this product must be rinsed off of grill and oven surfaces with potable water. *This product is not for Household or Retail Sale; For Industrial use only.*

Recommended for use only on porcelain enamel, iron and stainless steel. Do not get on exterior oven surfaces such as aluminum and chrome trim, baked enamel, coppertone or painted areas, or on linoleum or plastics. If accidental contact with these surfaces, wash off immediately with water and vinegar. Keep product off electrical connections, light switches, bulbs and receptacles.
