

Liquid Bio Stimulant

Bacterial Growth Enhancer

Proprietary formula containing the following nutrient sources; e.g. Urea-Ammonium Nitrates, Ammonium Polyphosphate & Potassium Chloride.

Liquid Bio Stimulant promotes bacterial/enzyme activity by providing a liquid food source. **Liquid Bio Stimulant** provides nitrogen, phosphorus and potash, which are readily absorbed by the microorganisms thus producing almost immediate degradation of waste. **Liquid Bio Stimulant** also enhances the activity of organisms already present in the soil.

USE: **Liquid Bio Stimulant** is specifically designed for use with CPE's bacterial waste degraders both liquids and solids as an activity start up formulation.

DIRECTIONS: Call CP Environmental at 1-800-428-3266 for site specific directions.
