

SOIL & DUST SOLUTIONS

DUST CONTROL for Less

ROADCONTROL⁺plus™

Soil/Road Stabilization and Dust Control

Road Control Plus™ is an environmentally safe polymer derived from natural ingredients. It is a biodegradable, non-toxic, cost-effective dust suppressant and soil stabilizer. Road Control Plus works by coating and binding surface material. It rejuvenates with moisture, is easy to maintain, and keeps dust particles bound. When used to stabilize roads prior to paving, asphalt lasts 2 times longer than untreated base. Available in 55 gallon, 275 gallon tote, and 4500 gallon tanker load.

DUST CONTROL

- Scarify and pulverize the surface to 1-2" deep
- Water as needed and apply Road Control Plus at the following rates:
 - First application: 1/2 gal per yd²
 - Subsequent applications: 1/4 gal per yd²
- Roll to compact for best results

DUST ABATEMENT

- Water the surface well and apply Road Control Plus at the rate of 1/3 gal per yd²

SOIL STABILIZATION

- Scarify and pulverize the surface to 1-2" deep
- Water as needed and apply Road Control Plus at the rate of 1/2 gal per yd²
- Regrade to mix well
- Roll to compact the surface
- Apply a topcoat of Road Control Plus at the same rate
